

Bluebird Nest Box

Prefer open grassy areas with mature trees, hayfields, pastures, large, chemical free lawns

80-100 meters from woodlots, bushy areas or other nest boxes.

Install a baffle or predator cone stop climbing predators including snakes.

A smooth galvanized pole deters climbing predators.

Common nest box predators include deer mice, weasels, raccoons, opossums, chipmunks, snakes, wrens, sparrows, crows, and bluejays.

Avoid fence lines as many predators travel along them.

Southeast facing keeps the wind out and maximizes early morning sun.

No perch, needed. It attract wrens and sparrows

1.5 to 1.8 meters high, any higher will attract sparrows
